

The James E. Dalen, MD, MPH, Distinguished Lecture for Health Policy Presents...

Jeffrey M. Drazen, MD

Editor-in-Chief, New England Journal of Medicine

Data Sharing in Clinical Trials

**Thursday,
February 8, 2018**

5:00 PM • Mel & Enid Zuckerman
College of Public Health
Drachman Hall A114,
1295 N. Martin Ave.

The lecture is free and open to the public.

Visitor parking is available on lots south (2029) and east (2030)
of lecture hall. Free after 5:00 PM

Clinical trial data are high-quality data that have been obtained because patients put themselves at risk to participate in the trial and clinical trialists designed and implemented a clinical trial to answer a specific question. In this talk, we will explore by example how clinical trial data have or have not been shared and the consequences thereof. We will then explore the imperatives for and barriers to clinical trial data sharing ending with the recommendations of the International Committee of Medical Journal Editors to share these data.

Born and raised in Clayton, Missouri, **Dr. Drazen** majored in applied physics at Tufts University and graduated from Harvard Medical School in 1972. After serving his medical residency at Peter Bent Brigham Hospital in Boston, he joined its Pulmonary Division and that of the Beth Israel Hospital, serving each as division chair for many years. Through his research, Dr. Drazen defined the role of novel endogenous chemical agents in asthma, leading to four licensed pharmaceuticals for asthma with tens of millions of people on treatment worldwide. In 2000, he assumed the post of editor-in-chief of the *New England Journal of Medicine*. During his tenure, the *Journal* has published major papers advancing the science of medicine, including the first descriptions of SARS, timely coverage of the Ebola and Zika virus epidemics, and major advances in the treatment of cancer, heart disease and lung disease. It has also been at the forefront of the international effort to register all clinical trials and to share clinical trial data. The *Journal* has over half a million readers every week and the highest impact factor of any journal publishing original research.

The James E. Dalen, MD, MPH, Distinguished Lecture for Health Policy – The endowment for the James E. Dalen Distinguished Lecture for Health Policy supports a series of visiting professors in health policy. These distinguished scholars offer lectures and discussions to our campus community and to the public on local, state, national and international health policy issues and connect the academic world with the “real world” of public health. James E. Dalen, MD, MPH, ScD (hon) has been a member of the University of Arizona faculty since 1988. He served as Dean of the College of Medicine from 1988 to 2001, and Vice President for Health Sciences from 1995 to 2001.
