Educational Programs Developed

2009-

- *University of Arizona's Graduate Certificate in Global Health & Development:* The Graduate Certificate in Global Health and Development is a 13-credit, distance-learning program that is designed to provide working professionals in the US and overseas with a flexible and convenient option for advancing their training in global health and development.
<https://publichealth.arizona.edu/academics/certificates/ghd>
- *University of Arizona's Graduate Certificate in Maternal and Child Health (MCH) Epidemiology:* This is a 15-credit, competency-based, distance-learning program that is designed to increase the capacity in MCH epidemiology of public health professionals serving in rural and/underserved Indian Health Service Regions and Appalachian Counties.

Courses Developed/Taught

2009-

- **CPH 533: Global Health - Master of Development Program (MDP):** The MDP program prepares students to better identify and address the challenges of sustainable development by providing coursework in the four pillar areas of health, natural, social sciences, and management sciences - combined with cross-sectoral field training
http://geography.arizona.edu/masters_development_practice. CPH 533 (MDP) is designed to equip MDP students with competencies in the pillar area of health. According to the Global Association of Master's in Development Practice, "essential to a mastery of global health sciences is the ability to see how health impacts the other three pillars, and how the other three pillars have an impact on global health." This course will equip MDP students with skills in analyzing how health impacts socioeconomic and human development as well as how socioeconomic development and the political economy influence human health. To address the Global MDP Association's requirement that the competencies address knowledge, skills and attitudes to function as development leaders, a key goal of this course is to help students to develop skills in critical thinking and problem solving in relation to global health issues.

- **CPH 547: Evidence-based policy and practice in global health & development (Online):** This is the capstone course in the University of Arizona's Graduate Certificate in Global Health and Development. It is designed to integrate knowledge and skills in the core disciplines of public health from a global health and development perspective. Students acquire skills in critical appraisal of global health programs, policies, and practices for evidence of effectiveness, and in using evidence to advocate for programs and policies.
- **CPH 536: Project design, implementation and evaluation in MCH (Online).** The focus of this course is to equip participants with skills in conceptualizing, developing, implementing, and evaluating small-scale projects in MCH.
- **CPH 529: Program evaluation in global health and development (Online):** This is designed to equip students with skills in conceptualizing, developing, implementing, and evaluating small-scale projects in global health and development.
- **CPH 533: Global Health:** This course examines major health problems of low, middle and high income countries. Students conduct in-depth analyses of health problems among various populations in multicultural settings, both nationally and internationally.
- **CPH 628: Public health research and evaluation:** This course provides a theoretical introduction and applied experience with methods for undertaking public health research and program evaluation. Activities involve review and critique of published public health research and evaluation articles, designing and presenting both a research and evaluation plan using standards set by federal funding agencies and practical problem solving in applying research and evaluation methods in the field.
- **CPH 534: CPH 534/SP13: Tropical Infectious Diseases & Global Health.** This course is designed to equip participants with skills in analyzing the biology and pathology of major tropical infectious disease as well as the social and cultural aspects that lead to their proliferation. At the end of this course, participants should be able to evaluate the impact of tropical infectious diseases on development, and describe prevention and management strategies to address prevailing tropical infectious diseases. Students should also be able to develop an "Issue Brief" relating to infectious diseases in a developing country and describe the work of a key player in global health in addressing the prevention and control of specific infectious diseases.

Training Program Developed

2007-2009

- **UAB Graduate Certificate in Global Health:** The Graduate Certificate in Global Health was developed with grant funding from *NIH Fogarty International Center's Framework for Global Program (Award # R25TW007501, Ehiri, J., PI)*. The 15-credit program is designed to equip participants with basic skills necessary to function effectively in global health practice. It was designed with two groups of participants in mind: i) individuals with a passion for global health, but without appropriate academic training in public health; ii) health professionals who need to update and enhance their skills, but do not have the time or flexibility to undertake a campus-based, full academic degree program.

Courses Developed/Taught

2002-2009

- **MCH690: Advanced leadership and practice in MCH:** This was a required course in UAB's MPH/DrPH in Maternal and Child Health. It was designed to provide students with leadership skills necessary to work effectively at the community level.
- **MCH606: The basics of community evaluation:** This was an elective course in UAB's MPH, Maternal and Child Health program. The course introduces students to community-based and community-oriented work with health-related agencies and programs serving women, children, adolescents, and families. It addresses fundamental questions and problems associated with conducting evaluations in these settings.
- **MCH617: Global health: principles and practice (3 credits):** This was a required course for students enrolled in UAB's MPH/DrPH program in global health. It was the University's flagship course in global health.
- **MCH608: Project planning and evaluation in global health:** This was the second required course for students enrolled in UAB's MPH/DrPH program in global health. It was designed to equip students with skills in conceptualizing, designing, implementing, and evaluating targeted interventions in global health.
- **LCS 104: Health without borders:** This was a freshman course designed in response to UAB's Freshman Learning Communities (FLC) Initiative. It was the anchor course in a three course FLC that integrated skills in public health, English composition, anthropology, and contemporary women's issues in world politics. In addition to helping to meet UAB's Quality Enhancement Program (QEP), it introduced UAB undergraduates to public health and global health.

TEACHING: Liverpool School of Tropical Medicine

Courses Developed/Taught

1999-2002

- **TROP 701: Topics in international health:** This course was designed to equip Master of Community Health students with skills in exploring concepts and thematic issues in global health policy, research, and practice.
- **TROP 705: Study design:** This course enabled Master of Community Health students to develop skills in research methods and information analysis relevant to community health practice. It took participants through the process of developing proposals for the Masters' thesis project, field data collection, and thesis preparation.
- **TROP 708: Overseas research internship and thesis:** The thesis project, which was carried out overseas, was an original piece of work that was research-based and relevant to health policy and practice in a low income country. The course provided opportunity for students to apply knowledge and skills in research methods learnt during the program. Participants spent eight weeks overseas, conducting field studies on behalf of clients (Ministries of Health, NGOs, and international health agencies, including the WHO, UNICEF, and other UN agencies).
- **TROP 715: Environmental hygiene in developing countries:** This course was designed to equip clinicians enrolled in the Diploma in Tropical Medicine & Hygiene (DTM&H) with knowledge and skills in analyzing sanitation-related health conditions, and strategies to promote environmental health for the protection of population health.

University of Alabama at Birmingham

2005-2009: *Chair, Executive Committee, UAB Framework Program for Global Health*

- The UAB Framework for Global Health Program is a university-wide initiative that worked to advance involvement in global health research, education, and service by UAB faculty and students (graduate and undergraduate).

The Specific aims accomplished by the Framework program under my leadership included:

- (1) Enhancement of the stream of UAB undergraduate and graduate students for Global Health study and research through multi- and inter-disciplinary courses, including
 - a. The creation of a new online graduate certificate program in global health.
 - b. Six new global health courses (to address social, cultural and environmental determinants for human health and access to care).
 - c. Two new field-based courses.
 - d. Several short term exchanges/internships for UAB undergraduate and graduate students at foreign partner institutions around the world.
- (2) Increased participation of faculty in pilot studies conducted at international sites, with special focus on multidisciplinary, collaborative research and mentoring of graduate students. The Framework program funded two projects at \$20,000 each for 3 years).
- (3) Enhancement of administrative and information management services to support coordination of international research and training opportunities, including:
 - The creation of a new web-based system that provides a "virtual" course catalog of all UAB "global health" related courses, a database of faculty and students engaged in international research, and a database for announcements pertaining to grants, meetings, training opportunities and local seminars.
